${ }^{(1)}$ Interest income and interest expense and the calculation of average yields on interest-earning assets and average rates on interest-bearing liabilities include the impact of hedge accounting. In the first quarter of 2018, we adopted Accounting Standard Update No. 2017-12, Derivatives and Hedging (Topic 815): Targeted Improvements to Accounting for Hedging Activities. As a result, interest income and interest expense amounts shown above for Q1 2018 include $\$ 1$ million and $\$ 30$ million, respectively, related to hedge ineffectiveness that was previously included in other non-interest income.

## Table 14: Notes to Loan, Allowance and Business Segment Disclosures (Tables 7-13)

${ }^{(1)}$ Nonperforming loan rates are calculated based on nonperforming loans for each category divided by period-end total loans held for investment for each respective category.
${ }^{(2)}$ Nonperforming assets consist of nonperforming loans, real estate owned ("REO") and other foreclosed assets. The total nonperforming asset rate is calculated based on total nonperforming assets divided by the combined period-end total loans held for investment, REO and other foreclosed assets.
${ }^{(3)}$ Primarily consists of the legacy loan portfolio of our discontinued GreenPoint mortgage operations.
${ }^{(4)}$ Represents foreign currency translation adjustments and the net impact of loan transfers and sales where applicable.
(5) Charges for the impacts of the Tax Act of $\$ 1.77$ billion are reflected in the Other category of our business segment results for Q4 2017. This amount is a reasonable estimate as of December 31, 2017, which may be adjusted during the measurement period ending no later than December 2018. The Tax Act refers to the Act to provide for reconciliation pursuant to titles II and V of the concurrent resolution on budget for fiscal year 2018 enacted on December 22, 2017.
${ }^{(6)}$ Some of our commercial investments generate tax-exempt income, tax credits or other tax benefits. Accordingly, we present our Commercial Banking revenue and yields on a taxableequivalent basis, calculated using the federal statutory tax rate ( $21 \%$ for the first quarter of 2018 and $35 \%$ for all periods in 2017) and state taxes where applicable, with offsetting reductions to the Other category.
${ }^{(7)}$ In the first quarter of 2018, we made a change in how revenue is measured in our Commercial Banking business to include the tax benefits of losses on certain investments. These tax benefits are included in revenue on a taxable-equivalent basis within our Commercial Banking business, with an offsetting reduction to the Other category. In addition, all revenue presented on a taxable-equivalent basis in our Commercial Banking business was impacted by the reduction of the federal tax rate set forth in the Tax Act. The net impact of the measurement change and the reduction of the federal tax rate was a decrease of $\$ 28$ million in revenue in our Commercial Banking business in the first quarter of 2018, with an offsetting impact to the Other category.
${ }^{(8)}$ Average yield on loans held for investment is calculated based on annualized interest income for the period divided by average loans held for investment during the period for the respective loan category. Annualized interest income is computed based on the effective yield of the respective loan category and does not include any allocations, such as funds transfer pricing.
${ }^{(9)}$ Total net revenue margin is calculated based on annualized total net revenue for the period divided by average loans held for investment during the period for the respective loan category.
(10) Purchase volume consists of purchase transactions, net of returns, for the period, and excludes cash advance and balance transfer transactions.
${ }^{(11)}$ Percentages represent period-end loans held for investment in each credit score category. Domestic card credit scores generally represent FICO scores. These scores are obtained from one of the major credit bureaus at origination and are refreshed monthly thereafter. We approximate non-FICO credit scores to comparable FICO scores for consistency purposes. Balances for which no credit score is available or the credit score is invalid are included in the 660 or below category.
${ }^{(12)}$ Percentages represent period-end loans held for investment in each credit score category. Auto credit scores generally represent average FICO scores obtained from three credit bureaus at the time of application and are not refreshed thereafter. Balances for which no credit score is available or the credit score is invalid are included in the 620 or below category.
${ }^{(13)}$ Criticized exposures correspond to the "Special Mention," "Substandard" and "Doubtful" asset categories defined by bank regulatory authorities.
(14) Includes charges incurred as a result of restructuring activities.
** Not meaningful.

## Reconciliation of Non-GAAP Measures

The following non-GAAP measures consist of tangible common equity ("TCE"), tangible assets and metrics computed using these amounts, which include tangible book value per common share, return on average tangible assets, return on average TCE and TCE ratio. We consider these metrics to be key financial performance measures that management uses in assessing capital adequacy and the level of returns generated. While these non-GAAP measures are widely used by investors, analysts and bank regulatory agencies to assess the capital position of financial services companies, our measures may not be comparable to similarly-titled measures reported by other companies. The following tables present reconciliations of these non-GAAP measures to the applicable amounts measured in accordance with GAAP.
