## Reconciliation of Non-GAAP Measures

We report certain non-GAAP measures that management uses in assessing its capital adequacy and the level of return generated. The following non-GAAP measures consist of selected adjusted results, tangible common equity ("TCE"), tangible assets and metrics computed using these amounts, which include tangible book value per common share, return on average tangible assets, return on average TCE and TCE ratio. We consider these metrics key financial performance measures. While our nonGAAP measures are widely used by investors, analysts and bank regulatory agencies to assess the capital position of financial services companies, they may not be comparable to similarly-titled measures reported by other companies. The following tables present reconciliations of these non-GAAP measures to the applicable amounts measured in accordance with GAAP.
