CAPITAL ONE FINANCIAL CORPORATION
Notes to the Condensed Consolidated Financial Statements
September 30, 1998
(in thousands, except per share data) (unaudited)
Note A: Basis of Presentation
The consolidated financial statements include the accounts of Capital One Financial Corporation (the "Corporation") and its subsidiaries. The Corporation is a holding company whose subsidiaries provide a variety of products and services to consumers. The principal subsidiaries are Capital One Bank (the "Bank"), which offers credit card products, and Capital One, F.S.B. (the "Savings Bank"), which provides certain consumer lending and deposit services. The Corporation and its subsidiaries are collectively referred to as the "Company."

The accompanying unaudited consolidated financial statements have been prepared in accordance with generally accepted accounting principles ("GAAP") for interim financial information and with the instructions to Form 10-Q and Article 10 of Regulation $S-X$. Accordingly, they do not include all of the information and footnotes required by GAAP for complete consolidated financial statements. In the opinion of management, all adjustments (consisting of normal recurring accruals) considered necessary for a fair presentation have been included. The preparation of financial statements in conformity with GAAP requires management to make estimates and assumptions that affect the amounts reported in the financial statements and accompanying notes. Actual results could differ from these estimates. Operating results for the three and nine months ended September 30, 1998 are not necessarily indicative of the results for the year ending December 31, 1998. The notes to the consolidated financial statements contained in the Annual Report on Form $10-\mathrm{K}$ for the year ended December 31, 1997 should be read in conjunction with these condensed consolidated financial statements. All significant intercompany balances and transactions have been eliminated. Certain prior period amounts have been reclassified to conform to the 1998 presentation.

Note B: Significant Accounting Policies
Cash and Cash Equivalents
Cash paid for interest for the nine months ended September 30, 1998 and 1997 was $\$ 289,064$ and $\$ 260,388$, respectively. Cash paid for income taxes for the nine months ended September 30,1998 and 1997 was $\$ 170,806$ and $\$ 94,295$, respectively.

Consumer Loans
In the fourth quarter of 1997, the Company recognized the estimated uncollectible portion of finance charge and fee income receivables. In addition, in the fourth quarter of 1997, the Company modified its methodology for charging off credit card loans (net of any collateral) to 180 days past-due, from the prior practice of charging off loans during the next billing cycle after becoming 180 days past-due.

## Earnings Per Share

In February 1997, the Financial Accounting Standards Board ("FASB") issued Statement of Financial Accounting Standards ("SFAS") No. 128, "Earnings per Share" ("SFAS 128") which became effective for periods ending after December 15, 1997, including interim periods. SFAS 128 replaced the calculation of primary and fully diluted earnings per share with basic and diluted earnings per share. Unlike primary earnings per share, basic earnings per share is based only on the weighted average number of common shares outstanding, excluding any dilutive effects of options and restricted stock. Diluted earnings per share is similar to the previously reported fully diluted earnings per share and is based on the weighted average number of common and common equivalent shares, including dilutive stock options and restricted stock outstanding during the year. Earnings per share amounts for all prior periods have been restated to conform to SFAS 128 requirements.

As of January 1, 1998, the Company adopted SFAS No. 130, "Reporting Comprehensive Income" ("SFAS 130"), which establishes new rules for the reporting and display of comprehensive income and its components. SFAS 130 requires unrealized gains or losses on available-for-sale securities and foreign currency translation adjustments, which prior to adoption were reported separately in stockholders' equity, to be included in other comprehensive income. The adoption of SFAS 130 had no impact on the company's net income or stockholders' equity. Prior year amounts have been reclassified to conform to SFAS 130 requirements.

Note C: Borrowings

In July 1998, the Corporation filed a Shelf Registration Statement on Form S-3 with the Securities and Exchange Commission for the issuance of up to $\$ 425,000$ aggregate principal amount of senior and subordinated debt, preferred stock and common stock, which was declared effective on July 14, 1998. In July 1998, the Corporation issued $\$ 200,000$ of 10 year unsecured senior notes under this shelf registration. Existing unsecured senior debt outstanding of the Corporation under a prior shelf registration of $\$ 200,000$ totals $\$ 125,000$ maturing in 2003.

Note D: Comprehensive Income

Comprehensive income for the three months ended September 30, 1998 and 1997 was as follows:

|  | Three Months Ended September 30 |  |  |  |
| :---: | :---: | :---: | :---: | :---: |
|  | 1998 |  | 1997 |  |
| Comprehensive Income: |  |  |  |  |
| Net income | \$ | 70,006 | \$ | 49,330 |
| Other comprehensive income |  | 28,103 |  | 1,422 |
| Total comprehensive income | \$ | 98,109 | \$ | 50,752 |

## Note E: Stock Repurchase

In July 1998, the Company's Board of Directors voted to repurchase up to an additional 1.5 million shares of the Company's common stock over the next two years, pursuant to the repurchase program initially adopted in July 1997, in order to mitigate the dilutive impact of shares issuable under its benefits plans, including its Associate Stock Purchase Plan, dividend reinvestment plan, stock incentive plans and other benefit plans.

Note F: Earnings Per Share
The following table sets forth the computation of basic and diluted earnings per share:

|  | Three Months Ended September 30 |  |  |  | Nine Months Ended September 30 |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |

| Dilutive potential common shares |  | 4,286 |  | 1,388 |  | 3,741 |  | 1,357 |
| Denominator for diluted earnings per share Adjusted weighted-average shares |  | 70,012 |  | 67,573 |  | 69,306 |  | 67,672 |
| Basic earnings per share | \$ | 1.07 | \$ | 0.75 | \$ | 3.09 | \$ | 1.98 |
| Diluted earnings per share | \$ | 1.00 | \$ | 0.73 | \$ | 2.92 | \$ | 1.94 |

Note G: Purchase of Summit Acceptance Corporation
In July 1998, the Company acquired Summit Acceptance Corporation ("Summit"), based in Dallas, Texas. Summit is a subprime automobile finance lender with approximately 180 employees and serviced loans of approximately $\$ 263,000$ as of the purchase date. The acquisition price for Summit was $\$ 53,585$ which was paid through the issuance of the Company's stock on July 31, 1998. The acquisition was accounted for as a purchase business combination and goodwill of approximately $\$ 68,000$ will be amortized over 15 years.

Note H: Commitments and Contingencies
In connection with the transfer of substantially all of Signet Bank's credit card business to the Bank in November 1994, the Company and the Bank agreed to indemnify Signet Bank (which has since been acquired by First Union Bank on November 30 , 1997) for certain liabilities incurred in litigation arising from that business, which may include liabilities, if any, incurred in the purported class action case described below.

During 1995, the Company and the Bank became involved in a purported class action suit relating to certain collection practices engaged in by Signet Bank and, subsequently, by the Bank. The complaint in this case alleges that Signet Bank and/or the Bank violated a variety of California state statutes and constitutional and common law duties by filing collection lawsuits, obtaining judgements and pursuing garnishment proceedings in the Virginia state courts against defaulted credit card customers who were not residents of Virginia. This case was filed in the Superior Court of California in the County of Alameda, Southern Division, on behalf of a class of California residents. The complaint in this case seeks unspecified statutory damages, compensatory damages, punitive damages, restitution, attorneys' fees and costs, a permanent injunction and other equitable relief.

In February 1997, the California court entered judgement in favor of the Bank on all of the plaintiffs' claims. The plaintiffs have appealed the ruling to the California Court of Appeal First Appellate District Division 4, and the appeal is pending.

Because no specific measure of damages is demanded in the complaint of the California case and the trial court entered judgement in favor of the Bank before the parties completed any significant discovery, an informed assessment of the ultimate outcome of this case cannot be made at this time. Management believes, however, that there are meritorious defenses to this lawsuit and intends to continue to defend it vigorously.

The Company is commonly subject to various other pending and threatened legal actions arising from the conduct of its normal business activities. In the opinion of management, the ultimate aggregate liability, if any, arising out of any pending or threatened action will not have a material adverse effect on the consolidated financial condition of the Company. At the present time, however, management is not in a position to determine whether the resolution of pending or threatened litigation will have a material effect on the Company's results of operations in any future reporting period.

In June 1998, the FASB issued SFAS No. 133 "Accounting for Derivative Instruments and Hedging Activities" ("SFAS 133"), which is required to be adopted in years beginning after June 15, 1999. SFAS 133 permits early adoption as of the beginning of any fiscal quarter after its issuance. SFAS 133 will require the Company to recognize all derivatives on the balance sheet at fair value. Derivatives that are not hedges must be adjusted to fair value through income. If the derivative is a hedge, depending on the nature of the hedge, changes in the fair value of derivatives will either be offset against the change in fair value of the hedged assets, liabilities, or firm commitments through earnings or recognized in other comprehensive income until the hedged item is recognized in earnings. The ineffective portion of a derivative's change in fair value will be immediately recognized in earnings. The Company has not yet determined what the effect of SFAS 133 will be on the earnings and financial position of the Company.

Item 2.
CAPITAL ONE FINANCIAL CORPORATION
Management's Discussion and Analysis of Financial Condition and Results of Operations

Introduction
Capital One Financial Corporation (the "Corporation") is a holding company whose subsidiaries provide a variety of products and services to consumers. The principal subsidiaries are Capital One Bank (the "Bank"), which offers credit card products, and Capital One, F.S.B. (the "Savings Bank"), which provides certain consumer lending and deposit services. The Corporation and its subsidiaries are collectively referred to as the "Company." As of September 30, 1998, the Company had 14.9 million customers and $\$ 16.3$ billion in managed consumer loans outstanding and was one of the largest providers of MasterCard and Visa credit cards in the world. The Corporation's common stock trades on the New York Stock Exchange under the symbol "COF" and is included in the S\&P 500 Index. The Company's profitability is affected by the net interest income and non-interest income earned on earning assets, consumer usage patterns, credit quality, the level of marketing expense and operating efficiency.

Earnings Summary
Net income for the three months ended September 30, 1998 of $\$ 70.0$ million, or $\$ 1.00$ per share, compares to net income of $\$ 49.3$ million, or $\$ .73$ per share, for the same period in 1997. All earnings per share amounts are feported on a diluted basis.

The increase in net income is primarily a result of an increase in asset and account volumes and rates. Net interest income increased $\$ 79.9$ million, or $82 \%$ as the net interest margin increased to $9.77 \%$ from $7.02 \%$ and average earning assets increased by $31 \%$. The provision for loan losses decreased $\$ 4.9$ million, or $7 \%$ as the reported net charge-off rate decreased to $4.04 \%$ from 4.57\%. Non-interest income increased $\$ 106.0$ million, or $38 \%$ primarily as a result of the increase in average managed accounts of $40 \%$. Marketing expense increased $\$ 65.7$ million, or $108 \%$, to $\$ 126.5$ million as the Company continues to invest in new product opportunities. Increases in salaries and associate benefits expense of $\$ 42.9$ million, or $59 \%$, and other non-interest expense (excluding marketing) of $\$ 48.9$ million, or $53 \%$, primarily reflected the cost of operations to manage the growth in accounts and the change in product mix. Each component is discussed in further detail in subsequent sections of this analysis.

Net income for the nine months ended September 30, 1998 was $\$ 202.6$ million, or $\$ 2.92$ per share, compared to net income of $\$ 131.2$ million, or $\$ 1.94$ per share, for the same period in 1997. This 54\% increase primarily reflected the increases in asset and account volumes accompanied by an increase in net interest margin as discussed above. Each component is discussed in further detail in subsequent sections of this analysis.

The Company analyzes its financial performance on a managed consumer loan portfolio basis. Managed consumer loan data adds back the effect of off-balance sheet consumer loans. The Company also evaluates its interest rate exposure on a managed portfolio basis.

The Company's managed consumer loan portfolio is comprised of on-balance sheet loans and loans held for securitization (collectively, "reported loans"), and off-balance sheet loans. Securitized loans are not assets of the Company and, therefore, are not shown on the balance sheet.

Table 1 summarizes the Company's managed consumer loan portfolio.

|  | Three Months Ended September 30 |  |  |  |
| :---: | :---: | :---: | :---: | :---: |
| (in thousands) | $1998 \quad 1997$ |  |  |  |
| Period-End Balances: |  |  |  |  |
| On-balance sheet consumer loans | \$ | 5,666,998 | \$ | 4,329,799 |
| Off-balance sheet consumer loans |  | 10,670,791 |  | 9,142,796 |
| Total managed consumer loan portfolio | \$ | 16,337,789 | \$ | 13,472,595 |
| Average Balances: |  |  |  |  |
| On-balance sheet consumer loans | \$ | 5,623,012 | \$ | 3,847,150 |
| Off-balance sheet consumer loans |  | 10,123,079 |  | 9,070,817 |
| Total average managed consumer loan portfolio | \$ | 15,746,091 | \$ | 12,917,967 |
|  | Nine Months Ended September 30 |  |  |  |
| (in thousands) |  | 1998 |  | 1997 |
| Average Balances: |  |  |  |  |
| Consumer loans held for securitization |  |  | \$ | 132,146 |
| On-balance sheet consumer loans | \$ | 5,210,649 |  | 3,834,547 |
| Off-balance sheet consumer loans |  | 9,548,182 |  | 8,765,192 |
| Total average managed consumer loan portfolio | \$ | 14,758,831 | \$ | 12,731,885 |

Since 1990, the Company has actively engaged in consumer loan securitization transactions. In accordance with SFAS No. 125 "Accounting for Transfers and Servicing of Financial Assets and Extinguishments of Liabilities" ("SFAS 125"), the Company records gains or losses on the securitization of consumer loan receivables based on the estimated fair value of assets sold and retained and liabilities incurred in the sale. Gains represent the present value of estimated excess net cash flows the Company has retained over the estimated outstanding period of the receivables and are included in servicing and securitizations income. This excess cash flow essentially represents an "interest only" ("I/O") strip, consisting of the excess finance charges and past-due fees over the sum of the return paid to certificateholders, estimated contractual servicing fees and credit losses. However, exposure to credit losses on the securitized loans is contractually limited to these excess cash flows. Certain estimates inherent in the determination of the fair value of the I/O strip are influenced by factors outside the Company's control, and as a result, such estimates could materially change in the near term. Any future gains that will be recognized in accordance with SFAS 125 will be dependent on the timing and amount of future securitizations. The Company will continuously assess the performance of new and existing securitization transactions as estimates of future cash flows change.

Table 2 indicates the impact of off-balance sheet consumer loans on average earning assets, net interest margin and loan yield for the periods presented. The Company intends to continue to securitize consumer loans.

(1) Net interest margin is equal to net interest income divided by average earning assets.

Risk Adjusted Revenue and Margin
In originating its consumer loan portfolio, the Company has and continues to pursue a low introductory interest rate strategy with accounts repricing to higher rates after six to 18 months from the date of origination. The amount of repricing is actively managed in an effort to maximize return at the consumer level, reflecting the risk and expected performance of the account. Separately, accounts also may be repriced upwards or downwards based on individual consumer performance. Recently, the Company has marketed low non-introductory rate cards to customers with the best established credit profiles. These low introductory rate and low non-introductory rate products typically have a balance transfer feature under which consumers can transfer balances to the Company from their other obligations. The Company's historic managed loan growth has been principally the result of this balance transfer feature. Industry competitors have continuously solicited the Company's customers with similar interest rate strategies. Management believes that the competition has put, and will continue to put, additional pressure on interest rate strategies.

By applying its information-based strategies ("IBS") and in response to dynamic competitive pressures, the Company also targets a significant amount of its marketing expense to other credit card product opportunities. Examples of such products include secured cards and other customized card products including affinity and co-branded cards, student cards and other cards targeted to certain markets that are underserved by the Company's competitors. These products do not have the immediate impact on managed loan balances of the balance transfer products but typically consist of lower credit limit accounts and balances that build over time. The terms of these customized card products tend to include annual membership fees and higher annual finance charge rates. The profile of the consumers targeted for these products, in some cases, may also tend to result in higher delinquency and consequently higher past-due and overlimit fees as a percentage of loan receivables outstanding than the balance transfer products.

The Company's products are designed with the objective of maximizing revenue for the level of risk undertaken. Management believes that comparable measures for external analysis are the risk adjusted revenue and risk adjusted margin of the portfolio. Risk adjusted revenue is defined as net interest income and non-interest income less net charge-offs. Risk adjusted margin measures risk adjusted revenue as a percentage of average earning assets. It considers not only the loan yield and net interest margin, but also the fee income associated with these products. By deducting net charge-offs, consideration is given to the risk inherent in these differing products.

Table 3 provides income statement data and ratios for the Company's managed consumer loan portfolio. The causes of increases and decreases in the various components of risk adjusted revenue are discussed in further detail in subsequent sections of this analysis.

(1) Excludes the $\$ 16$ million incremental impact on credit card securitization income resulting from the implementation of SFAS 125.
(2) As a percentage of average managed earning assets.

Net Interest Income
Net interest income is interest and past-due fees earned from the Company's consumer loans and securities less interest expense on borrowings, which includes interest-bearing deposits, other borrowings and borrowings from senior and deposit notes.

Reported net interest income for the three months ended September 30, 1998 was $\$ 177.1$ million, compared to $\$ 97.2$ million for the same period in the prior year, representing an increase of $\$ 79.9$ million, or $82 \%$. For the nine months ended September 30, 1998, net interest income was $\$ 511.6$ million compared to $\$ 268.6$ million for the same period in 1997, representing an increase of $\$ 243.0$ million, or $90 \%$. Average earning assets increased $31 \%$ and $26 \%$ for the three and nine months ended September 30, 1998, respectively, versus the same periods in 1997. The yield on earning assets increased 269 and 314 basis points for the three and nine months ended September 30, 1998, respectively, to $15.62 \%$ from $12.93 \%$ and to $15.48 \%$ from $12.34 \%$ as compared to the same periods in the prior year. The increase was primarily attributable to a 250 and 388 basis point increase in the yield on consumer loans for the three and nine months ended September 30, 1998, respectively, to 18.45\% from 15.95\% and to 18.78\% from $14.90 \%$ respectively, as compared to the same periods in the prior year. The yield on consumer loans increased due to an increase in the amount and frequency of past-due fees charged as compared to the same period in the prior year and the Company's continued shift to higher yielding products, especially in the reported loan portfolio, during the comparable periods.

Table 4 provides average balance sheet data, an analysis of net interest income, net interest spread (the difference between the yield on earning assets and the cost of interest-bearing liabilities) and net interest margin for the three and nine months ended September 30, 1998 and 1997.

| Total liabilities and equity | \$8,051,884 |  |  |  | \$6,502,985 |  |  |
| Net interest spread |  |  |  | 9.19\% |  |  | $6.05 \%$ |
| Interest income to average earning assets |  | Interest income to |  | 15.48\% |  |  | 12.34\% |
| Interest expense to |  |  |  |  |  |  | 5.90 |
| Net interest margin |  |  |  | 9.75\% |  |  | 6.44\% |

(1) Interest income includes past-due fees on loans of approximately $\$ 221,849$ and $\$ 89,336$ for the nine months ended September 30, 1998 and 1997, respectively.

Managed net interest income increased $\$ 110.1$ million, or $33 \%$, and $\$ 319.3$ million, or $34 \%$, for the three and nine months ended September 30 , 1998, respectively, compared to the same periods in the prior year. The increases in managed net interest income were the result of managed average earning assets increasing $19 \%$ and $16 \%$ and the managed net interest margin increasing 110 basis points and 140 basis points to $10.15 \%$ and $10.13 \%$ for the three and nine months ended September 30, 1998, respectively. The increase in managed net interest margin principally reflects increases in the amount and frequency of past-due fees and growth in higher yielding loans.

Net interest income is affected by changes in the average interest rate earned on earning assets and the average interest rate paid on interest-bearing liabilities. In addition, net interest income is affected by changes in the volume of earning assets and interest-bearing liabilities. Table 5 sets forth the dollar amount of the increases (decreases) in interest income and interest expense resulting from changes in the volume of earning assets and interest-bearing liabilities and from changes in yields and rates.

|  | Three Months Ended <br> September 30, 1998 vs 1997 |  |  | Nine Months Ended September 30, 1998 vs 1997 |  |  |  |  |

| Total interest expense | 24,239 | 26,788 | $(2,549)$ | 55,165 |  | 55,217 |  | (52) |
| Net interest income(1) | \$ 79,900 | \$ 35,228 | \$44,672 | \$ 242,990 | \$ | 81,557 |  | 161,433 |
| (1) The change in interest due to both volume and rates has been allocated in proportion to the relationship of the absolute dollar amounts of the change in each. The changes in income and expense are calculated independently for each line in the table. The totals for the volume and yield/rate columns are not the sum of the individual lines. |  |  |  |  |  |  |  |  |

Servicing and Securitizations Income
Servicing and securitizations income increased $\$ 36.7$ million and $\$ 42.2$ million, or $20 \%$ and $8 \%$, for the three and nine months ended September 30, 1998, respectively, from the same periods in the prior year due to average securitized loans increasing $12 \%$ and $9 \%$ over the same periods, coupled with decreasing losses in the off-balance sheet portfolio for the three months ended September 30, 1998, which resulted in increasing estimated future spreads. Also impacting servicing and securitizations income in the first nine months of 1998 was the current recognition of estimated uncollectible finance charge and fee income receivables implemented in the fourth quarter of 1997.

## Other Non-Interest Income

Other reported non-interest income including service charges and other fees and interchange, increased to $\$ 169.9$ million and $\$ 490.6$ million, or $69 \%$ and 93\%, for the three and nine months ended September 30, 1998, respectively, compared to $\$ 100.6$ million and $\$ 254.1$ million for the same periods in the prior year. The increase in other non-interest income was due to an increase in the average number of accounts of $40 \%$ and $39 \%$ for the three and nine months ended September 30, 1998, respectively, compared to the same periods in the prior year and the Company's continued shift to more fee-based accounts, especially in the reported loan portfolio during the comparable periods.

Managed non-interest income increased to $\$ 264.6$ million and $\$ 738.5$ million, or $31 \%$ and $40 \%$, for the three and nine months ended September 30, 1998, respectively, due to the increase in the average number of accounts and increases in the amount and frequencies of fees (including annual membership, interchange and overlimit) assessed on accounts.

## Non-Interest Expense

Non-interest expense for the three months ended September 30, 1998 was $\$ 383.5$ million, an increase of $\$ 157.5$ million, or $70 \%$, over $\$ 226.0$ million for the same period in the prior year. Contributing to the increase was marketing expense which increased $\$ 65.7$ million, or $108 \%$, to $\$ 126.5$ million for the three months ended September 30,1998 from $\$ 60.8$ million for the same period in the prior year, as the Company continued to invest in new product opportunities, including a $\$ 23.1$ million investment in the company's marketing of telecommunications services, as described under "Business Outlook." Salaries and associate benefits increased $\$ 42.9$ million, or $59 \%$, to $\$ 116.1$ million for the three months ended September 30,1998 from $\$ 73.2$ million for the same period in
the prior year. All other non-interest expense increased $\$ 48.9$ million, or $53 \%$, to $\$ 140.9$ million from $\$ 92.0 \mathrm{million}$ for the same period in the prior year. The increase in other non-interest expense, as well as, the increase in salaries and benefits expense, was primarily the result of a $40 \%$ increase in the average number of accounts for the three months ended september 30, 1998, and a continued shift in product mix to more service-intensive accounts, which resulted in an increase in infrastructure and other operational costs.

Non-interest expense for the nine months ended September 30, 1998 was $\$ 1.0$ billion, an increase of $\$ 362.6 \mathrm{million}$, or $57 \%$, over $\$ 641.6 \mathrm{million}$ for the same period in the prior year. Contributing to the increase was marketing expense which increased $\$ 127.5$ million, or $80 \%$ to $\$ 287.3$ million for the nine months ended September 30,1998 from $\$ 159.8$ million for the same period in the prior year, as the Company continued to invest in new product opportunities. Salaries and associate benefits increased $\$ 124.4$ million, or $58 \%$ to $\$ 337.5$ million for the nine months ended September 30,1998 from $\$ 213.1$ million for the same period in the prior year. This increase reflects an additional $\$ 48.0$ million in compensation expense associated with the Company's associate stock plans as compared to the same period in the prior year. All other non-interest expense increased $\$ 110.8$ million, or $41 \%$, to $\$ 379.5$ million for the nine months ended September 30,1998 from $\$ 268.6$ million for the same period in the prior year. The increase in other non-interest expense, as well as, the increase in salaries and benefits expense not attributed to options, was primarily the result of a 39\% increase in the average number of accounts for the nine months ended September 30, 1998.

## Income Taxes

The Company's income tax rate was $38 \%$ for the three and nine months ended September 30, 1998 and 1997 and includes both state and federal income tax components.

Asset Quality
The asset quality of a portfolio is generally a function of the initial underwriting criteria used, seasoning of the accounts, levels of competition, account management activities and demographic concentration, as well as general economic conditions. The seasoning of the accounts is also an important indicator of the delinquency and loss levels of the portfolio. Generally, accounts tend to exhibit a rising trend of delinquency and credit losses as they season.

Table 6 shows the Company's consumer loan delinquency trends for the periods presented as reported for financial statement purposes and on a managed basis. The entire balance of an account is contractually delinquent if the minimum payment is not received by the payment due date. However, the Company generally continues to accrue interest until the loan is charged off.

In the fourth quarter of 1997, the Company modified its methodology for charging off credit card loans (net of any collateral) to 180 days past-due from the prior practice of charging off loans during the next billing cycle after becoming 180 days past-due. In addition, in the fourth quarter of 1997, the Company recognized the estimated uncollectible portion of finance charge and fee income receivables. The delinquency rate for reported loans was 5.05\% as of September 30, 1998, down from 5.34\% as of September 30, 1997 and up from 5.03\% as of June 30, 1998. The delinquency rate for the managed consumer loan portfolio was $4.90 \%$ as of September 30, 1998, down from 6.36\% as of September 30, 1997 and down from 5.14\% as of June 30, 1998. During the three months ended September 30, 1998, the Company's reported portfolio experienced an increase in higher yielding accounts and more seasoned accounts as newer loans were securitized. Both the managed and reported portfolio's delinquency rate decrease as of September 30, 1998, as compared to September 30, 1997, reflected seasonality and improvements in consumer credit performance, as well as the impact from previous modifications in charge-off policy and finance charge and fee income recognition.

Net charge-offs include the principal amount of losses (excluding accrued and unpaid finance charges, fees and fraud losses) less current period recoveries. Table 7 shows the Company's net charge-offs for the periods presented on a reported and managed basis.

|  | Three Months Ended September 30 |  | Nine Months Ended September 30 |  |
| :---: | :---: | :---: | :---: | :---: |
| (dollars in thousands) | 1998 | 1997 | 1998 | 1997 |
| Reported: |  |  |  |  |
| Average loans outstanding | \$ 5,623,012 | \$ 3,847,150 | \$ 5,210,649 | \$ 3,966,693 |
| Net charge-offs | 56,726 | 43,967 | 171,704 | 139,901 |
| Net charge-offs as a percentage of average loans outstanding | 4.04\% | 4.57\% | 4.39\% | 4.70\% |
| Managed: |  |  |  |  |
| Average loans outstanding | \$15,746,091 | \$12,917,967 | \$14,758,831 | \$12,731,885 |
| Net charge-offs | 198,069 | 215,041 | 623,792 | 601,074 |
| Net charge-offs as a percentage of average loans outstanding | 5.03\% | 6.66\% | 5.64\% | 6.29\% |

(1) Includes consumer loans held for securitization.

The managed net charge-off rate decreased 163 basis points and 65 basis points to $5.03 \%$ and $5.64 \%$ for the three and nine months ended September 30, 1998, respectively from $6.66 \%$ and $6.29 \%$ for the comparable periods in the prior year. The reported net charge-off rate decreased 53 basis points and 31 basis points to $4.04 \%$ and $4.39 \%$ for the three and nine months ended September 30, 1998, respectively, from $4.57 \%$ and $4.70 \%$ for the comparable periods in the prior year. The decreases in managed and reported net charge-off rates were the result of improved general economic trends in consumer credit performance compared to the same periods in the prior year, with less of an impact on the reported charge-offs due to the increased level of seasoned and higher yielding products included in the on-balance sheet portfolio.

Provision and Allowance for Loan Losses
The provision for loan losses is the periodic expense of maintaining an adequate allowance at the amount estimated to be sufficient to absorb possible future losses, net of recoveries (including recovery of collateral), inherent in the existing on-balance sheet loan portfolio. In evaluating the adequacy of the allowance for loan losses, the Company takes into consideration several factors including economic trends and conditions, overall asset quality, loan seasoning and trends in delinquencies and expected charge-offs. The Company's primary guideline is a calculation which uses current delinquency levels and other measures of asset quality to estimate net charge-offs. Consumer loans are typically charged off (net of any collateral) at 180 days past-due, although earlier charge-offs may occur on accounts of bankrupt or deceased consumers. Bankrupt consumers' accounts are generally charged off within 30 days after receipt of the bankruptcy petition. Once a loan is charged off, it is the Company's policy to continue to pursue the collection of principal, interest and fees for non-bankrupt accounts.

Management believes that the allowance for loan losses is adequate to cover anticipated losses in the on-balance sheet consumer loan portfolio under current conditions. There can be no assurance as to future credit losses that may be incurred in connection with the Company's consumer loan portfolio, nor can there be any assurance that the loan loss allowance that has been established by the Company will be sufficient to absorb such future credit losses. The allowance is a general allowance applicable to the on-balance sheet consumer loan portfolio.

Table 8 sets forth the activity in the allowance for loan losses for the periods indicated. See "Asset Quality," "Delinquencies" and "Net Charge-Offs" for a more complete analysis of asset quality.

| Balance at beginning of period | \$ | 213,000 | \$ | 118,500 | \$ | 183,000 | \$ | 118,500 |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| Provision for loan losses |  | 67,569 |  | 72,518 |  | 212,448 |  | 168,481 |
| Transfer to loans held for securitization |  |  |  |  |  |  |  | $(2,625)$ |
| Increase from Summit acquisition |  | 6,720 |  |  |  | 6,720 |  |  |
| Other |  | 437 |  | (51) |  | 536 |  | (80) |
| Charge-offs |  | $(74,885)$ |  | $(52,697)$ |  | $(219,271)$ |  | $(156,526)$ |
| Recoveries |  | 18,159 |  | 8,730 |  | 47,567 |  | 19,250 |
| Net charge-offs (1) |  | $(56,726)$ |  | $(43,967)$ |  | $(171,704)$ |  | $(137,276)$ |
| Balance at end of period | \$ | 231,000 |  | 47,000 | \$ | 231,000 | \$ | 147,000 |
| Allowance for loan losses to loans at period-end |  | 4.08\% |  | 3.40\% |  | 4.08\% |  | 3.40\% |

(1) Excludes consumer loans held for securitization.

For the three months ended September 30, 1998, the provision for loan losses decreased $7 \%$ to $\$ 67.6$ million from $\$ 72.5$ million for the same period in the prior year as the reported net charge-off rate decreased to 4.04\% from 4.57\%, offset by the increase in average reported loans of $46 \%$. For the nine months ended September 30, 1998, the provision for loan losses increased 26\% to $\$ 212.4$ million from $\$ 168.5$ million for the comparable period in the prior year, as average reported loans increased by $31 \%$. The allowance for loan losses as a percentage of on-balance sheet consumer loans increased to $4.08 \%$ as of September 30, 1998, from 3.40\% as of September 30, 1997 due to the change in mix of its reported loan portfolio. The increase in the allowance for loan losses also reflects the increase in on-balance sheet loans to $\$ 5.7$ billion as of September 30, 1998, an increase of $31 \%$ from September 30, 1997.

Liquidity and Funding
Liquidity refers to the Company's ability to meet its cash needs. The Company meets its cash requirements by securitizing assets and by debt funding. As discussed in "Managed Consumer Loan Portfolio," a significant source of liquidity for the Company has been the securitization of consumer loans. Maturity terms of the existing securitizations vary from 1998 to 2008 and typically have accumulation periods during which principal payments are aggregated to make payments to investors. As payments on the loans are accumulated for the participants in the securitization and are no longer reinvested in new loans, the Company's funding requirements for such new loans increase accordingly. The occurrence of certain events may cause the securitization transactions to amortize earlier than scheduled which would accelerate the need for funding.

Additionally, the Company maintains a portfolio of high-quality securities such as U.S. Treasuries, U.S. Government Agency and mortgage-backed securities, commercial paper, interest-bearing deposits with other banks, federal funds and other cash equivalents in order to provide adequate liquidity and to meet its ongoing cash needs. As of September 30, 1998, the Company held $\$ 1.7$ billion in such securities.

Table 9 shows the maturation of certificates of deposit in denominations of $\$ 100,000$ or greater ("large denomination CDs") as of September 30, 1998.

TABLE 9 - MATURITIES OF LARGE DENOMINATION CERTIFICATES-\$100,000 OR MORE

|  | September 30, 1998 |  |  |
| :---: | :---: | :---: | :---: |
| (dollars in thousands) |  | ance | Percent |
| 3 months or less | \$ | 90,350 | 30.01\% |
| Over 3 through 6 months |  | 38,832 | 12.90 |
| Over 6 through 12 months |  | 23,083 | 7.67 |
| Over 1 through 5 years |  | 148,801 | 49.42 |
| Total | \$ | 301,066 | 100.00\% |

The Company's other borrowings portfolio consists of $\$ 1.4$ billion in borrowings maturing within one year and $\$ 26.1$ million in borrowings maturing after one year.

Table 10 shows the Company's unsecured funding availability and outstandings as of September 30, 1998.

TABLE 10 - FUNDING AVAILABILITY

|  | September 30, 1998 |  |  |
| :---: | :---: | :---: | :---: |
| (dollars or dollar equivalents in millions) | Effective/ Issue Date Availability(1) | Outstanding, Net | $\begin{aligned} & \text { Final } \\ & \text { Maturity } \end{aligned}$ |

| Domestic revolving credit facility | 11/96 | \$ | 1,700 |  |  | 11/00 |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| UK/Canada revolving credit facility | 8/97 |  | 350 | \$ | 146 | 8/00 |
| Senior bank note program(2) | 4/97 |  | 8,000 |  | 3,400 | - |
| Non-U.S. bank note program | 10/97 |  | 1,000 |  | 5 | - |
| Corporation Shelf Registration | 7/98 |  | 625 |  | 324 | - |
| Deposit note program | 4/96 |  | 2,000 |  |  | - |
| Floating rate junior subordinated capital income securities(3) | 1/97 |  | 100 |  | 98 | 2/27 |

(1) All funding sources are revolving except for the Corporation Shelf Registration and the floating rate junior subordinated capital income securities. Funding availability under the credit facilities is subject to compliance with certain representations, warranties and covenants. Funding availability under all other sources is subject to market conditions.
(2) Includes availability to issue up to $\$ 200$ million of subordinated bank notes, none outstanding as of September 30, 1998.
(3) Qualifies as Tier 1 capital at the Corporation and Tier 2 capital at the Bank.

The domestic revolving credit facility is comprised of two tranches: a $\$ 1.375$ billion Tranche A facility available to the Bank and the Savings Bank, including an option for up to $\$ 225$ million in multi-currency availability, and a $\$ 325$ million Tranche B facility available to the Corporation, the Bank and the Savings Bank, including an option for up to $\$ 100$ million in multi-currency availability. The borrowings of the Savings Bank are limited to $\$ 750$ million. The final maturity of each tranche may be extended for two additional one-year periods.

The UK/Canada revolving credit facility is used to finance the Company's expansion in the United Kingdom and Canada. The facility is comprised of two tranches: a Tranche A facility in the amount of (pound) 156.5 million ( $\$ 249.8$ million equivalent based on the exchange rate at closing) and a Tranche B facility in the amount of C $\$ 139.6$ million ( $\$ 100.2$ million equivalent based on the exchange rate at closing). An amount of (pound) 34.6 million or C $\$ 76.9$ million ( $\$ 55.2$ million equivalent based on the exchange rates at closing) may be transferred between the Tranche A facility and the Tranche B facility, respectively, upon the request of the Company. The Corporation serves as the guarantor of all borrowings by its subsidiaries under the UK/Canada revolving facility.

Under the Corporation's shelf registration statements, filed with the Securities and Exchange Commission, the Corporation from time to time may offer and sell (i) senior or subordinated debt securities consisting of debentures, notes and/or other unsecured evidences, (ii) preferred stock, which may be issued in the form of depository shares evidenced by depository receipts and (iii) common stock. In July 1998, the Corporation filed a Shelf Registration Statement on Form S-3 with the Securities and Exchange Commission for the issuance of up to $\$ 425$ million aggregate principal amount of senior and subordinated debt, preferred stock and common stock, which was declared effective on July 14, 1998. In July 1998, the Corporation issued $\$ 200$ million of 10 year unsecured senior notes under this shelf registration. Existing unsecured senior debt outstanding of the Corporation under the a prior shelf registration of $\$ 200$ million totals $\$ 125$ million maturing in 2003 .

Capital Adequacy

The Bank and the Savings Bank are subject to capital adequacy guidelines adopted by the Federal Reserve Board (the "Federal Reserve") and the Office of Thrift Supervision (the "OTS") (collectively, the "regulators"), respectively. The capital adequacy guidelines and the regulatory framework for prompt corrective action require the Bank and the Savings Bank to maintain specific capital levels based upon quantitative measures of their assets, liabilities and off-balance sheet items as calculated under Regulatory Accounting Principles. The inability to meet and maintain minimum capital adequacy levels could result in regulators taking actions that could have a material effect on the company's consolidated financial statements. Additionally, the regulators have broad discretion in applying higher capital requirements. Regulators consider a range of factors in determining capital adequacy, such as an institution's size, quality and stability of earnings, interest rate risk exposure, risk diversification, management expertise, asset quality, liquidity and internal controls

The most recent notifications from the regulators categorized the Bank and the Savings Bank as "well-capitalized." To be categorized as "well-capitalized," the Bank and the Savings Bank must maintain minimum capital ratios as set forth in the following table. As of September 30, 1998, there are no conditions or events since the notifications discussed above that management believes have changed either the Bank or the Savings Bank's capital category.

As of September 30, 1998, the Bank and the Savings Bank's ratios of capital to managed assets were $5.40 \%$ and $8.01 \%$, respectively.

|  | Ratios | Minimum for Capital Adequacy Purposes | To Be "Well-Capitalized" Under Prompt Corrective Action Provisions |
| :---: | :---: | :---: | :---: |
| September 30, 1998 |  |  |  |
| Capital One Bank |  |  |  |
| Tier 1 Capital | 12.12\% | 4.00\% | 6.00\% |
| Total Capital | 14.70 | 8.00 | 10.00 |
| Tier 1 Leverage | 10.89 | 4.00 | 5.00 |
| Capital One, F.S.B.(1) |  |  |  |
| Tangible Capital | 12.88\% | 1.50\% | 6.00\% |
| Total Capital | 19.28 | 12.00 | 10.00 |
| Core Capital | 12.88 | 8.00 | 5.00 |
| September 30, 1997 |  |  |  |
| Capital One Bank |  |  |  |
| Tier 1 Capital | 10.70\% | 4.00\% | 6.00\% |
| Total Capital | 13.58 | 8.00 | 10.00 |
| Tier 1 Leverage | 11.01 | 4.00 | 5.00 |
| Capital One, F.S.B.(1) |  |  |  |
| Tangible Capital | 10.70\% | 1.50\% | 6.00\% |
| Total Capital | 16.52 | 12.00 | 10.00 |
| Core Capital | 10.70 | 8.00 | 5.00 |

(1) Until June 30, 1999, the Savings Bank is subject to capital requirements that exceed minimum capital adequacy requirements, including the requirement to maintain a minimum Core Capital ratio of $8 \%$ and a Total Capital ratio of $12 \%$.

During 1996, the Bank received regulatory approval and established a branch office in the United Kingdom. In connection with such approval, the Company committed to the Federal Reserve that, for so long as the Bank maintains such branch in the United Kingdom, the Company will maintain a minimum Tier 1 leverage ratio of $3.0 \%$. As of September 30,1998 , the Company's Tier 1 leverage ratio was $13.67 \%$.

Additionally, certain regulatory restrictions exist which limit the ability of the Bank and the Savings Bank to transfer funds to the Corporation. As of September 30, 1998, retained earnings of the Bank and the Savings Bank of $\$ 122.5$ million and $\$ 44.0$ million, respectively, were available for payment of dividends to the Corporation, without prior approval by the regulators. The Savings Bank, however, is required to give the OTS at least 30 days' advance notice of any proposed dividend and the OTS, in its discretion, may object to such dividend.

## Off-Balance Sheet Risk

The Company is subject to off-balance sheet risk in the normal course of business including commitments to extend credit, excess servicing income from securitization transactions, interest rate swap agreements ("swaps") and forward foreign exchange rate agreements ("FRAs"). In order to reduce the interest rate sensitivity and to match asset and liability repricings, the Company has entered into swaps which involve elements of credit or interest rate risk in excess of the amount recognized on the balance sheet. In order to reduce the exchange rate sensitivity on foreign currency denominated assets, the Company has entered into FRAs which involve elements of credit or exchange rate risk in excess of the amount recognized on the balance sheet. Swaps and FRAs present the Company with certain credit, market, legal and operational risks. The Company has established credit policies for off-balance sheet instruments as it does for on-balance sheet instruments.

The Company measures exposure to its interest rate risk through the use of a simulation model. The model generates a distribution of possible twelve-month managed net interest income outcomes based on (i) a set of a plausible interest rate scenarios, as determined by management based upon historical trends and market expectations, (ii) all existing financial instruments, including swaps, and (iii) an estimate of ongoing business activity over the coming twelve months. The Company's asset/liability management policy requires that based on this distribution there be at least a $95 \%$ probability that managed net interest income achieved over the coming twelve months will be no more than $3 \%$ below the mean managed net interest income of the distribution. As of September 30, 1998, the Company was in compliance with the policy; more than $95 \%$ of the outcomes generated by the model produce a managed net interest income of no more than $1.1 \%$ below the mean outcome.

This business outlook section summarizes the Company's expectations for earnings for the year ending December 31,1998 and, to a limited extent, for the year ending December 31, 1999 and its primary goals and strategies for continued growth. The statements contained in this section are based on management's current expectations. Certain of the statements are forward looking statements and, therefore, actual results could differ materially. Factors which could materially influence results are set forth throughout this section and in the Company's Annual Report on Form 10-K for the year ended December 31, 1997 (Part I, Item 1, Cautionary Statements).

The Company has set an earnings target, dependent on the factors set forth below, for its diluted earnings per share for the year ending December 31, 1998 to increase by $40 \%$ over 1997 and for the year ending December 31, 1999 to increase approximately $30 \%$ over 1998. As discussed elsewhere in this report and below, the Company's actual earnings are a function of its revenues (net interest income and non-interest income on its earning assets), consumer usage and payment patterns, credit quality of its earning assets (which affects fees and charge-offs), marketing expenses and operating expenses.

## Product and Market Opportunities

The Company's strategy for future growth has been, and is expected to continue to be, to apply its proprietary IBS to its credit card business as well as to other businesses, including selected non-card consumer lending products and telecommunication services. The Company will seek to identify new product opportunities and to make informed investment decisions regarding new and existing products. The Company's credit card and other financial and non-financial products are subject to competitive pressures, which management anticipates will increase as these markets mature.

## Credit Cards

Credit card opportunities include, and are expected to continue to include, various low introductory and intermediate-rate balance transfer products, low non-introductory rate products, as well as other customized credit card products; such as secured cards, affinity and co-branded cards, student cards and other cards tailored for specific customer segments. The company intends to continue to offer these customized products, which are distinguished by a varied range of credit lines, targeted borrowers and pricing structures. Certain of these cards, the low non-introductory rate products, are marketed to customers with the best established credit profiles and are characterized by higher credit lines and an expectation of lower delinquencies and credit losses than the Company's traditional low introductory-rate balance transfer products. Other customized card products are distinguished by several characteristics, including better response rates, less adverse selection, higher yields (including fees), lower credit lines, less attrition and a greater ability to reprice than the Company's traditional products. These other products involve higher operational costs and, in some cases, higher delinquencies and credit losses than the Company's traditional products. More importantly, all of these customized products continue to have less volatile returns than the traditional products in recent market conditions.

## Automobile Finance

On July 31, 1998, the Company completed the acquisition of summit Acceptance Corporation ("Summit"), a Texas corporation. Summit is a subprime automobile finance lender located in Dallas, Texas, with 180 employees and serviced loans of approximately $\$ 263$ million as of July 31, 1998. Summit provides the Company with a platform to test and apply its IBS to the automobile loan market.

Telecommunications
The Company is increasing its efforts to market telecommunications services, through its subsidiary America One Communications, Inc. ("America One"). America One's initial business, the reselling of wireless services, has recently begun to experience growth in the number of customers and accounts. Significant marketing investment is being allocated to America One's telecommunications business.

## International Expansion

The Company has expanded its existing operations outside of the United States, with an initial focus on the United Kingdom and Canada. The Company has experienced growth in the number of accounts and loan balances in its international business. To support its expansion in the United Kingdom and provide a platform into Europe, in July the Company opened a new operations center in Nottingham, England.

The Company will continue to apply its IBS in an effort to balance the mix of credit card products together with other financial and non-financial products and services, to optimize profitability within the context of acceptable risk. The Company's growth through expansion and product diversification will be affected by the ability of the Company to internally build or to acquire the operational and organizational infrastructure necessary to engage in new businesses and to recruit experienced personnel to assist in the management and operations of these businesses and the availability of capital necessary to fund these new businesses. Although management believes that it has the personnel, financial resources and business strategy necessary for continued success, there can be no assurance that the Company's historical financial performance will necessarily reflect its results of operations and financial condition in the future.

The Company's 1998 marketing expenses are expected to exceed such expenses in 1997, as the Company continues to invest in its various credit card products and services, and other financial and non-financial products and services. The Company cautions, however, that an increase in marketing expenses does not necessarily equate to a comparable increase in outstanding balances or accounts based on historical results. As the Company's portfolio continues to increase, additional growth to offset attrition requires increasing amounts of marketing. Intense competition in the credit card market has resulted in a decrease in credit card response rates and reduced productivity of marketing dollars invested in certain lines of business. In addition, the cost to acquire new accounts varies among product lines. With competition affecting the profitability of existing balance transfer card products, the Company has been allocating and expects to continue to allocate a greater portion of its marketing expense to other customized credit card products and other financial and non-financial products. Additionally, the costs to acquire an America One wireless account include the cost of a free phone delivered to the customer, and consequently are substantially more than the cost to acquire a credit card account. The Company intends to continue a flexible approach in its allocation of marketing expenses. The actual amount of marketing investment is subject to a variety of external and internal factors, such as competition in the consumer credit industry, general economic conditions affecting consumer credit performance, the asset quality of the Company's portfolio and the identification of market opportunities along product lines that exceed company targeted rates for return on investment.

Moreover, the amount of marketing expense allocated to various product segments will influence the characteristics of the Company's portfolio because the various product segments are characterized by different account growth, loan growth and asset quality characteristics. The Company currently expects that its growth in consumer accounts and in managed consumer loans will continue in the last quarter of 1998 and into 1999. Actual growth, however, may vary significantly depending on the Company's actual product mix and the level of attrition on the Company's managed portfolio, which is primarily affected by competitive pressures.

Impact of Delinquencies, Charge-off Rates and Attrition
The Company's earnings are particularly sensitive to delinquencies and charge-offs on the Company's portfolio and on the level of attrition due to competition in the credit card industry. As delinquency levels fluctuate, the resulting amount of past-due and overlimit fees, which are significant sources of revenue for the Company, will also fluctuate. Further, the timing of revenues from increasing or decreasing delinquencies precedes the related impact of higher or lower charge-offs that ultimately result from varying levels of delinquencies. Delinquency and net charge-off rates are not only impacted by general economic trends in consumer credit performance, including bankruptcies, but also by the continued seasoning of the Company's portfolio and the product mix.

The Company's expectations for 1998 and 1999 earnings are based on management's belief that consumer credit quality is stabilizing. Management expects that during the fourth quarter of 1998 charge-offs will remain stable, while delinquency rates may increase modestly due to seasonality and the seasoning of the customized card products. Management, however, cautions that delinquency and charge-off levels are not always predictable and may vary from projections. In the case of an economic downturn or recession, delinquencies and charge-offs are likely to increase. In addition, competition in the credit card industry, as measured by the volume of mail solicitations, remains very high. Increased competition can affect the Company's earnings by increasing attrition of the Company's outstanding loans (thereby reducing interest and fee income) and by making it more difficult to retain and attract more profitable customers.

Year 2000

## The Year 2000 Issue and the Company's State of Readiness

The year 2000 problem is a result of computer systems using two digits rather than four digits to define an applicable year. The Company utilizes a significant number of internal computer software programs and operating systems across its entire organization. In addition, the Company depends on its external business vendors to provide external services for its operations. To the extent the software applications of the Company or its vendors contain codes that are unable to appropriately interpret the year 2000 and beyond, some level of modification, or even possibly replacement of such applications, may be necessary.

In October 1996, the Company formed a year 2000 project office to identify software systems and computer-related devices that required modification for the year 2000. Shortly after its inception, the project office executed a five step program for the Company's information technology computer based systems. This strategy calls for awareness of the existence of information technology systems Company wide, assessment of those systems for year 2000 readiness, renovation of those systems and their date coding functions, validation of those renovations and implementation of all renovations made. This strategy is based in large part on the regulatory guidelines published by the Federal Financial Institutions Examination Counsel.

The Company identified approximately 70 distinct project areas to categorize its information technology systems. These project areas consist of not only typical information technology systems, like the cardholder, credit and customer service systems, but also certain other non-information technology systems such as the Company's air conditioning, telephone and elevator systems. The strategy requires prioritization of all project areas and assignment of
individual implementation milestones. As of september 30, 1998, approximately seventy-nine percent of all of the Company's project areas have been renovated. More importantly, this includes the complete renovation of all of the Company's mission critical information technology systems, which renovations the company is currently implementing and testing. The Company's start-up information technology systems in the U.K. and those in its newly acquired subsidiary, Summit Acceptance Corporation, are in the process of being evaluated for compliance. The Company expects to have all systems and applications in place and fully tested by the end of first quarter 1999, and will use the remaining time in 1999 for any system refinements that may be needed.

The Company is also addressing the effect of the year 2000 on other non-information technology systems not included as part of the project areas. These non-information systems primarily consist of desk top computer applications used by the Company's employees. The Company expects to renovate these applications using products prepared by outside vendors and the renovations are expected to be completed by the end of the first quarter of 1999.

In addition, the Company utilizes outside business vendors in its day-to-day operations. Consequently, the Company is assessing the year 2000 readiness of its external business vendors to project their viability into the year 2000. These vendors include credit bureaus, collection agencies, utilities and other related service providers, the U.S. postal service, telephone companies, technology vendors, banks that are creditors of the Company or which provide cash management, trustee, paying agent, stock transfer agent or other services. The Company has requested information from its vendors about their actions to become year 2000 compliant, placing extensive focus on its high priority vendors. At this point, management is unable to determine whether or to what extent the systems of its business vendors will, in fact, be timely remediated. The Company will continue to actively monitor the efforts of its vendors and take actions to mitigate exposure to year 2000 issues resulting from the failure of its vendors to be compliant.

## The Costs to Address the Company's Year 2000 Issues

The costs incurred by the Company through the third quarter of fiscal 1998 to address year 2000 compliance for its information technology systems were approximately $\$ 4.7$ million, of which $\$ 2.5$ million was incurred during the first nine months of 1998. The Company estimates it expects to incur an additional $\$ 1.3$ million in costs for a total of approximately $\$ 6$ million in direct costs for remediation of its information technology systems. Total costs, including costs associated with non-information technology systems and vendor contingency planning, will not materially impact the Company's results.

## The Company's Contingency Plan

The Company's Year 2000 Project Office is in the assessment stage of contingency planning. To date, the Company has established contingency planning work groups in each of its business units. These work groups are tasked with (i) identifying year 2000 risks, (ii) assessing the business impact of these risks and (iii) developing contingency plans to mitigate the risks. The company expects to complete the contingency planning assessment stage by the end of 1998. The Company will then document and test individual contingency plans through the first quarter of 1999.

## The Risks of the Company's Year 2000 Issues

Although the Company expects to have all of its system modifications complete by the end of the first quarter of 1999, allowing a sufficient amount of time to further test systems in 1999, unforeseen problems could arise in the year 2000 giving rise to delays and malfunctions which may impact the Company's business and financial results. In addition, the failure of third parties to provide the Company with products, services or systems that meet year 2000 requirements could impact the Company's business and operations. For example, failure of the U.S. postal service or the Company's local and long distance carriers to be year 2000 compliant could cause disruption or delay in the Company's ability to solicit new customers and service the accounts of its existing customers.

The estimated year 2000 costs and the Company's expectations that its systems, and those of its third-party partners and vendors, will be year 2000 compliant are forward-looking statements. These statements are based on management's reasonable estimates and assumptions about future events and are subject to risks and uncertainties. Although the Company believes that its has taken the necessary precautionary measures to assure that the year 2000 will not adversely affect its business, there is no guarantee that the Company's year 2000 expectations will be achieved and actual results could differ materially.

## Cautionary Factors

The Company's strategies and objectives outlined above and the other forward looking statements contained in this section involve a number of risks and uncertainties. The Company cautions readers that any forward looking information is not a guarantee of future performance and that actual results could differ materially. In addition to the factors discussed above, among the other factors that could cause actual results to differ materially are the following: continued intense competition from numerous providers of products and services which compete with the Company's businesses; with respect to financial products, changes in the Company's aggregate accounts or consumer loan balances and the growth rate thereof, including changes resulting from factors such as shifting product mix, amount of actual marketing expenses made by the company and attrition of accounts and loan balances; an increase in credit losses (including increases due to a worsening of general economic conditions); the
ability of the Company to continue to securitize its credit cards and consumer loans and to otherwise access the capital markets at attractive rates and terms to fund its operations and future growth; difficulties or delays in the development, production, testing and marketing of new products or services; losses associated with new products or services; financial, legal, regulatory or other difficulties that may affect investment in, or the overall performance of, a product or business, including changes in existing laws to regulate further the credit card and consumer loan industry and the financial services industry, in general; the amount of, and rate of growth in, the Company's expenses (including salaries and associate benefits and marketing expenses) as the Company's business develops or changes or as it expands into new market areas; the availability of capital necessary to fund the Company's new businesses; the ability of the Company to build the operational and organizational infrastructure necessary to engage in new businesses or to expand internationally; the ability of the Company to recruit experienced personnel to assist in the management and operations of new products and services; the ability of the Company and its suppliers to successfully address Year 2000 compliance issues; and other factors listed from time to time in the Company's SEC reports, including, but not limited to, the Annual Report on Form 10-K for the year ended December 31, 1997 (Part I, Item 1, Cautionary Statements).
Item 6. Exhibits and Reports on Form 8-K

| (a) | Exhibits: |
