2002 Originations	35.85%	32.47%	30.46%	33.70%	35.50%	35.02%

As of September 30, 2011, approximately \$888 million of outstanding receivables, representing approximately 18.96% of the total outstanding receivables in the Capital One Bank (USA), N.A. Small Business Segment at such date, related to accounts that were originated on or before December 31, 2001 and are not included in the table above.

The monthly principal payment rate for any month is calculated as the total amount of principal payments received during such month divided by the amount of principal receivables outstanding as of the beginning of such month.

For each period presented, the principal payment rate is calculated as the average of the monthly principal payment rates during such period.

For pre-2007 originations, the origination date for each account is the date the solicitation to the accountholder was mailed. For originations beginning in 2007, the origination date for each account is the date on which the account is opened and an account number is assigned. However, for purposes of determining average principal receivables for all originations, including pre-2007 originations, the origination date for each account is the date on which the account is opened and an account number is assigned.
