The net loss rate is calculated by dividing the gross losses, net of recoveries, by the average amount of principal receivables outstanding for the applicable period.

For the year ended 2006, the net loss rate excludes approximately \$10.42 million in recoveries generated from the sale of the Credit Recovery Services portfolio. The loss rate would be lower if this amount was included.

YTD performance is not necessarily indicative of actual results for the entire year.

The origination date for each account is the date on which the account is opened and an account number is assigned.

For each account comprising the Master Trust Consumer Segment, performance data is based on the account's performance on and after the date on which such account was added to the Master Trust Consumer Segment.

No Consumer accounts have been added since 2011.

The following table sets forth the loss experience for the Capital One Master Trust Small Business Segment for each of the periods shown. In each case, the information is grouped by year of account origination.
